Vacuum Tokens Now Available from Stock from TokensDirect.com

TokensDirect now offers standard vacuum tokens which are available from stock for immediate delivery. Vacuum tokens are an ideal way to reward customers who purchase upper-level washes from in-bay automatics. For self-serve washes, vacuum tokens serve to regulate traffic flow by providing a finite timeframe for a vacuum cycle (as opposed to free vacuums which can be used by a single customer for hours at a time). These standard brass 0.984-inch tokens are available in quantities as low as 1,000 with immediate shipment. TokensDirect standard vacuum tokens can be viewed at www.tokensdirectstore.com

TokensDirect, a division of Osborne Coinage Co, offers a full line of tokens through their online store with factory direct pricing, low minimum order quantities and fast turnaround time on all orders. More than 250,000 tokens in a variety of designs and sizes are available for immediate shipment. Custom tokens minted with company name, logo and marketing message can be shipped within 10 business days.

To speak with a sales specialist, contact TokensDirect at 866.274.0868 or via e-mail at ask@tokensdirect.com.
